	SECRET	25X1A
	-2	
0=144	23 January. After 8 a.m., there was air activity by ground attack planes which circled closely over the field. Between 11 a.m. and about 2:30 p.m., two UIL-28g	
25X1	When air activity was discontinued, 12 jet bombers were parked in front of the northern hangers and 8 jet bombers along the railroad line.	
2.	At 11 a.m. on 24 January, a commission from Wittenberg arrived at the field for stock-taking. The team first went into the headquarters building.	
3	In January, officer Garashuk (fnu) (phonetic spelling) at the field was promoted to ceptain.	•
25X1 4	On 24 January, searchlight truck was parked near the radio installation in the eastern extension of the runway. The searchlight, about 1.5 meters in diameter, stood on the ground at the side of the truck.	
25X1A1.	Comment. Jueterbog-Altes Lager airfield is still occupied by an air reconnaissance regiment and a ground attack regiment. It is believed that the reconnaissance regiment is equipped with about 22 IL-28s including some UIL-28s and the ground attack regiment with 55 to 60 IL-10s. The reconnaissance regiment conducted a few training flights. It was repeatedly observed that the planes had five-man crews; the fifth man was probably given instructions. During the reported period, the most flights were made on 21 January 1953, when 36 IL-10s made individual flights. The aircraft numbers reported were previously observed.	
25X1A ₂	Comment. Captain Garashuk (phonetic spelling) belongs to the OATB	25X1
